CONFERENCE - EXPO - AWARDS
&
BOX Cricket Tournament

## 27 – 28 February 2019

## Vivanta by Taj – Goa

It is unanimously suggested that coal, which has been the dominant source of fuel for power generation in India (almost three-fourths is currently coal-based), will continue to be a critical source for generating baseload electricity. Various estimates indicate that electricity generated from coal is expected to grow twofold to threefold by 2030.

With an average of 730 MT of coal consumed by the power plants in our country by the end of financial year 2018 which tuned to an average of 210 MT of fly ash generated by then with efforts of ash utilisation had resulted in achieving just 59% by the same year end.

The Indian government has been pushing for a target of 1.5 billion tonnes of coal production annually by 2020, most of which will be used in the power sector. In this context, current issues-status, policies, regulations, and bottlenecks-regarding the disposal of fly ash generated by thermal power plants are to be examined.

The Ministry of Environment, Forest and Climate Change has been issuing mandates since 1999, prescribing targets for the use of fly ash by TPPs, with an aim to achieve 100 per cent ash utilisation in a phased manner. These were subsequently amended in 2003, 2009 and 2016. As per the 2009 notification, all coal/lignite-based power plants as well as expansion units in operation before the notification date (November 3, 2009) were required to achieve a utilisation level of at least 50 per cent of fly ash generated within one year of the issue of the notification, at least 60 per cent within two years, 75 per cent within three years, 90 per cent within four years and 100 per cent within five years. However, several plants failed to achieve the prescribed targets and thus, in the January 2016 amendment, the timeline to achieve 100 per cent fly ash utilisation was extended to December 31, 2017.

As far as the mode of utilisation was concerned, the CEA's report indicates that the utilisation of fly ash is the highest in the cement sector with 24.04 per cent of the total fly ash used, followed by bricks and tiles at 7.37 per cent. The concrete industry segment has the lowest level of utilisation at 0.6 per cent.

For the purposes of quantitative analysis, 951 MT of cement production and 1,340 MT of coal in electricity generation by 2030 have been considered. At average ash content in coal of 33%, this implies that the annual fly ash generation by 2030 will be approximately 437 MT. If the current trends in utilisation of flyash were to continue, overall the utilisation will tune up to 310 MT by 2030, with cement's share in utilisation, as a percentage of total fly ash generated, increasing from 25% to 35% by 2030. While cement's fly ash requirement will grow fourfold, to 151 MT in 2030, approximately 128 MT of fly ash will still remain unutilised. This will require an additional 2,300 hectares of land and 1.3 billion cubic metres of water for ash ponds, exacerbating the existing problems concerning fly ash disposal.

The industry is currently challenged as utilities strive to meet environmental standards. Consequences for coal ash utilization will include a large increase in the amount of FGD gypsum, mercury-laden activated carbons in the fly ash, and a change in fly ash composition as utilities change fuel supplies in response to new environmental controls.

## Participant Profile

Regulators & Policy Makers
Senior Executives of Steel, Power, Cement and Mining
Utilities and Power Producers
Industries Bodies and Business Chambers
Research Institutes & Academia
Environmentalists
Technocrats & Consultants
Logistic Companies & Suppliers
Fly Ash Handling Experts
Fly ash by-product Producers
Construction and Real Estate Companies
Scientists and Faculty
Slug & Slurry Handlers

FLY ASH UTILISATION

CONFERENCE - EXPO - AWARDS
&
BOX Cricket Tournament

27 – 28 February 2019

Vivanta by Taj – Goa

## The way forward

The current utilisation levels highlight the fact that fly ash utilisation remains inadequate and greater efforts need to be stepped up to meet the desired targets. There is an urgent need to ensure that fly ash is used in an environmentally compatible manner. The renovation and modernisation of coal and lignite plants must include technological advancements that enable them to store dry fly ash so that it can be made available to users in dry form. Further, in order to lower their water footprint, TPPs need to switch from the low-concentration slurry disposal method, which involves excessive water usage, to the high-concentration slurry disposal method, which are more environments friendly.

Also, regulations should be introduced to encourage the use of fly ash in the construction of embankments for laying railway lines. The use of fly ash in agriculture and waste development has been fairly low, primarily owing to the presence of heavy and radioactive elements in fly ash. These concerns need to be addressed in order to realise the huge potential of fly ash in this segment.

In sum, there is huge potential for utilising fly ash in various industries and the country needs to develop appropriate guidelines and strategies that take it closer to achieving its goal.

**Mission Energy Foundation** suggested several policies and regulations—ranging from tighter air pollution standards and efficient technology to developing policy framework for managing waste products—to improve the sector. The results of Mission Energy Foundation's study and its recommendations spurred a wide public debate and, over the last few years, the government announced a series of draft regulations and policies to help improve the sector's performance. Both coal-based electricity and cement are crucial inputs to economic growth; their substitutability is limited due to various factors, discussions regarding which are beyond the scope of this article are being discussed at various forums of Mission Energy Foundation.

The **8th edition FLY ASH UTILISATION 2019 – Conference – Expo – Awards**; is intended to provide a forum to meet and discuss the science and applications for coal ash and to transfer knowledge and ideas that will benefit their innovative utilization, processing, handling, storage, transportation and disposal.

**FLY ASH UTILISATION 2019** expands its scope to include new bio-based ash resources and their expanding relevance for multiple applications, such as road construction and agriculture and will also bring focus on SLAGS (e.g., GBFS / blast furnace, steel slags) and their co-existence with ashes.

Scenarios of ash generation and utilisation shall be presented by the industry experts alongside key technical, regulatory, pricing, logistical, and behavioural issues that shall be addressed to reach complete fly ash utilisation during the two days of value packed session at Fly Ash Utilisation 2019.

**FLY ASH UTILISATION 2019 is scheduled on 27 - 28 February 2019 at Vivanta by Taj - Goa**, which is expected to attract participants worldwide focusing on the business, logistics and technical challenges and opportunities in the coal combustion by-products sector. The two day of 360 degree technical discussions will be packed with multiple networking opportunities among regional and international guests.

## CONFERENCE

**FLY ASH UTILISATION 2019** is intended to provide a forum to meet and discuss the science and applications for coal ash and to transfer knowledge and ideas that will benefit their innovative utilization, processing, handling, storage, transportation and disposal with expanding its scope to include new bio-based ash resources and their expanding relevance for multiple applications, such as road construction and agriculture and will also bring focus on SLAGS (e.g., GBFS / blast furnace, steel slags) and their co-existence with ashes.

## EXPO

Exhibiting at **FLY ASH UTILISATION 2019** is a cost effective and invaluable tool to help deliver your technology, product, equipment and services to senior decision makers to core target market that will help grow business in varied ways creating multiple opportunities to interact and grow business.

## AWARDS

The objective of **FLY ASH UTILISATION AWARD 2019** is to encourage & motivate to adopt best practices and become role models for others to emulate. The awards will reflects your commitment to Environment Protection & enhances your corporate status and image; boosting morale of concerned employees and stakeholders, motivating management and staff of the organization to excel.

## BOX Cricket Tournament – 2019

It doesn't matter whether you know Cricket or not, this activity is just as engaging for a Cricket novice as it is for a passionate veteran. As a team building activity, it checks all the points; Strategy, change management, playing to your skills, competitive analysis, risk vs reward and more.

LET'S PLAY CRICKET

## 8 Teams 8 Players per Team

**BOX Cricket Tournament – 2019**

It doesn't matter whether you know Cricket or not, this activity is just as engaging for a Cricket novice as it is for a passionate veteran. As a team building activity, it checks all the points; Strategy, change management, playing to your skills, competitive analysis, risk vs reward and more.

To increase the focus on enhancing coordination and productivity among the individuals within the team that thereby increasing output for an organisation for serving this purpose; thus, Mission Energy Foundation takes this opportunity to organise “BOX Cricket Tournament” this year during the FLY ASH UTILISATION 2019

**BOX Cricket Tournament 2019 IS NOT JUST AVERAGE TEAM BUILDING ACTIVITY. IT'S DESIGNED FOR THINKERS AND DOERS.**

**Criteria:**
8 Teams - 8 Players per Team
Participants need to apply during their registrations, teams will be selected / shortlisted by the organisers on various criteria's set by them
If 4 or more participants are found interested in participating in BOX Cricket Tournament are from the same organisation; then they are eligible to be in a one team and also choose their captain
Necessary cricket gears will be provided by the organisers
Decision of the organisers if final and binding to all.

## Why SPONSOR?

Our aim is to deliver you an event that exceeds your expectations, thus becoming an integrated part of your annual marketing program.

Sponsoring this **FLY ASH UTILISATION 2019** will make your company stand out as a leader in this burgeoning industry and will leave a strong impression of your brand in key decision makers minds. Sponsors have an incredible amount of presence and it will not only give your company optimum exposure but also the opportunity for delegates to meet you and your executives to find out more about your role and business opportunities in the sector.

- Gain **PUBLICITY** with our advertising and promotional campaigns
- Obtain **DIRECT ACCESS** to potential clients during and after with our meticulously prepared confidential delegate list
- Receive a **KEY SPEAKING POSITION** to address an audience of top executives and decision makers from the industry
- Create **PERMANENT REMINDERS** of your product or services in conference documentation
- Profile yourself as **INDUSTRIAL LEADER**, as your corporate logo and profile will be featured prominently in event marketing collaterals
- **NETWORKING** with the industries leading Government Officials, Senior Level Delegates and Experts
- Achieve **GREATER EXPOSURE** and **BRAND BUILDING** through our partners and much more

# FLY ASH UTILISATION

CONFERENCE - EXPO - AWARDS
&
BOX Cricket Tournament

**27 – 28 February 2019**

**Vivanta by Taj – Goa**

## EXPO

Throughout during the conference days, there will be a select number of leading solution providers who will discuss and advise on their latest products, solutions and services to a targeted number of senior level decision makers and technology-including regulatory affairs, financing structures and many more… Make sure you stay ahead of the competition and **SECURE YOUR PLACE NOW!**

You will benefit from multiple opportunities to talk with the clients and prospects you want to do business with and kick start your sales. All under one roof and all in just two days - saving you both time and money! As exhibition space is strictly limited and is already booking fast!

Exhibiting at **FLY ASH UTILISATION 2019** is a cost effective and invaluable tool to help deliver your technology, product, equipment and services to senior decision makers of your core target market and will help grow your business in following ways:

**ENFORCE** your **BRAND** and promote your services to generate and customers bases interest

Meet senior level decision makers to **EASE** of doing **BUSINESS**

Make new contacts and BUILD lasting RELATIONSHIPS

**DISPLAY** your **CAPABILITIES** at an international platform to those developers, utilities and manufacturers who need your project financing services or project development technology.

Take advantage of a central point of contact from which to **DEVELOP BUSINESS** and raise your profile in this growing sector.

**STRENGTHEN** existing **BUSINESS PARTNERSHIPS** and create profitable new leads as you interact with your core customer base.

## Exhibit Now!

Indian Company: INR 13500 Per Sq. Mtr. + 18% GST
Overseas Company: USD 450 Per Sq. Mtr.

**For Details Contact:**

**Shri. Sanjay Dua**
**sanjay@missionenergy.org / +919820814644**

## Visitor Profile

Participants will benefit from the high quality information exchange and networking opportunities. The expo will be marked by the presence of key decision makers and key players from the government and corporate world in India and abroad:

- Diplomats and senior government officials including policy makers and regulatory authorities
- Senior industry leaders from power, coal, chemical, petroleum and many other sectors
- Senior management teams from renowned private and public sector companies
- Entrepreneurs, technologists, operators and service providers
- Energy associates, producers and consumers
- International suppliers and trade organizations
- Equipment suppliers and service Companies
- Environmentalists, research and development scientists
- Investment banks & financial institutions

## Exhibitors Entitles to Receive

**Minimum Space 3x2 Sq. Mtr.**
**2 Delegate Passes for Conference**
**Company Logo on Summit Brochure**
**Company Logo on Backdrop**
**Modular Shell Stand Structure**
**Two Chairs & One Table**
**Fascia with Company Name**
**Power Socket for Power Supply**

## AWARD

The **Fly Ash Utilisation Awards 2019** will again be presented to utilities and its services sector who demonstrate highest level of commitment and best practice in utilisation of FLY ASH. Over the years the awards have its aim to recognize exemplary operations, systems and the evidence of their impact to business vitality. The awards serve as a catalyst to understanding the intrinsic value of environment management in business excellence and sustainability.

This year **Fly Ash Utilisation Awards** shall honour innovative developments and solutions for excellence and sustainability among the utilities, small or large, who have demonstrated their efforts in better utilisation of fly ash for the years to come ahead...

**Mission Energy Foundation** invites nominations from companies and their units having strong concern and commitment for fly ash utilisation and is willing to improve their own performance.

## Award Categories

- FLYASH UTILISATION AWARD 2019 — Excellence in Policy Initiative – State Govt.
- FLYASH UTILISATION AWARD 2019 — Efficient Management of Fly Ash ≤500MW
- FLYASH UTILISATION AWARD 2019 — Efficient Management of Fly Ash ≥500MW
- FLYASH UTILISATION AWARD 2019 — Efficient Management of Fly Ash - CPP
- FLYASH UTILISATION AWARD 2019 — Green Building Material Award - Cement
- FLYASH UTILISATION AWARD 2019 — Green Building Material Award – AAC Blocks / Bricks / Others
- FLYASH UTILISATION AWARD 2019 — Technology Excellence – Design & Engineering
- FLYASH UTILISATION AWARD 2019 — Technology Excellence – Technology Provider
- FLYASH UTILISATION AWARD 2019 — Excellence in Research & Development
- FLYASH UTILISATION AWARD 2019 — Excellence in Transportation / Supply Chain

**BOX Cricket Tournament**

☐ Yes, I would like to participate

☐ No, I would like to give it a miss this time

(For more than 3 delegates kindly make copies of the registration form)

## Payment Terms

Payment is required within 10 working days on receipt of invoice. If a booking is received 10 working days before the conference a credit card number will be taken to confirm your place, likewise if full payment has not been received before the conference date.

**NOTE:**

- Kindly fill the registration form completely
- Kindly provide with a valid email id for correspondence
- A confirmation of the registration will be sent via email after receipt of the payment
- No refund will be made in case of no-show / no-attendance
- Registration fee is exclusive of service tax as applicable
- Registration fee include lunch, refreshment and conference document/material at the venue.
- It does not include cost of accommodation and travel

**Cancellation Policy:**

Should a delegate be unable to attend, a substitute delegate from the company is always welcome at no extra charge. Alternatively, for any cancellations, the following rules shall apply

- 70% refund of registration fee if cancellation is done on or before 20 working days of the schedule
- 50% refund of registration fee if cancellation is done on or before 15 working days of the schedule
- Thereafter, no refunds can be made

**Important note:**

Please quote the name of the participant and event title on the advice when remitting payment. Bank charges to be deducted from the participation organisation's own accounts. Attendance will only be permitted upon receipt of full payment. It may be necessary for reasons beyond the control of the organisor to alter the content or the event date or location or the identity of the speaker/s.
